

## Übungsaufgaben Lösungen

$$1. \frac{3}{9} + \frac{4}{9} = \frac{7}{9}$$

$$2. \frac{5}{12} + \frac{7}{12} = \frac{12}{12} = 1$$

$$3. \frac{9}{16} - \frac{2}{16} = \frac{7}{16}$$

$$4. \frac{19}{20} - \frac{15}{20} = \frac{4}{20} = \frac{1}{5}$$

$$5. \frac{6}{8} * \frac{9}{7} = \frac{54}{56} = \frac{27}{28}$$

$$6. \frac{9}{10} * \frac{6}{9} = \frac{54}{90} = \frac{3}{5}$$

$$7. \frac{4}{7} : \frac{8}{10} = \frac{40}{56}$$

$$8. \frac{1}{10} : \frac{5}{7} = \frac{7}{50}$$
